

Sample Primary School Report

Title: School Report

School Name:

Student Name:

Year Level:

Mid Year or End of Year

Explanation of the Five Progress Descriptors

The Five Progress Descriptors

The goal for most students is to reach the **Proficient** level by the end of the school year. 

- **Emerging:** Your child is starting to learn basic skills and needs regular support to reach their goals.
- **Developing:** Your child is practicing new skills and can use them with help from the teacher.
- **Consolidating:** Your child is becoming secure in these skills and uses them on their own most of the time.
- **Proficient:** Your child fully meets the standard for their year level and is ready for the next year of learning.
- **Exceeding:** Your child is working confidently beyond the expected standard for their year level. 

Explanation of the Effort Descriptors

Needs Improvement: Needs regular support to stay focused and complete tasks.

Inconsistent: Sometimes puts in effort, but not consistently.

Consistently: Usually works steadily and tries their best.

Strong: Works hard, stays focused, and takes pride in their learning.

Outstanding: Always gives their best effort and goes above expectations.

Kaiako Comment

Comment

Student shows strong enthusiasm when confident in her learning. She understands that hard work leads to success. Alana is working to develop her self-belief so she can persevere through challenging tasks. By maintaining a positive attitude during these setbacks, she will recognise that she can overcome any challenge.

Reading

Overall Achievement: Consolidating

Effort:
Consistent

Kaiako comment

Student **on track to meet expectations.**

She is able to read a range of texts with increasing accuracy and fluency and she is developing confidence in using knowledge of spelling patterns, prefixes, and suffixes to read unfamiliar words.

She is learning to break longer words into manageable parts to support reading and she is able to understand main ideas and supporting details in texts.

She is developing the ability to make inferences using evidence from the text and she is explaining their thinking with increasing clarity and independence.

Next steps

- Monitor their understanding of a range of texts and repair meaning by adjusting reading speed to accommodate complexity, rereading, visualising, checking, decoding, and asking and answering questions of the text.
- Respond to texts by sharing opinions and personal thoughts and feelings about the ideas in texts.
- Make connections within and between texts and their own knowledge of topics, their experiences, and their knowledge of the world.

Word Recognition and Reading Enrichment

Comprehension

Critical Analysis

Writing

Overall Achievement: Developing

Effort:
Consistent

Kaiako comment

Student **not yet on track to meet expectations.**

She writes legibly with increasing fluency and she spells most single-syllable words correctly, including common spelling patterns.

She is developing the ability to use simple suffixes and contractions with growing accuracy and she writes a sequence of sentences about a topic or event.

She is beginning to add detail to their writing to support and develop their ideas and she is learning to use simple compound sentences to connect their ideas.

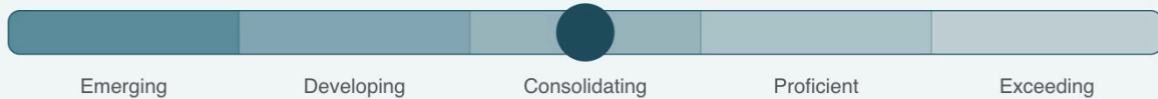

Next steps

- Understanding of incomplete (fragment) and run-on sentences.
- Check each sentence and add any missing capital letters and full stops, with close support.
- Identify and work towards a specific writing goal based on revisions and edits made to previous writing.

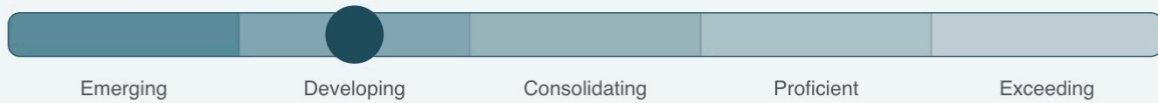

Help at home

- Encourage your child to write a short paragraph where all sentences relate to the same idea.
- Ask your child questions (who, what, where, why) to help them add more detail to their writing.
- Support your child to check sentences for missing words or errors.

Composition

Writing Process

Kaiako comment

Student **is not yet on track to meet expectations.**

She is able to read, write, and represent numbers up to 1,000 and is developing a solid understanding of place value and she is using rounding to make estimates with increasing accuracy.

She is applying addition and subtraction facts with growing independence using both mental and written strategies and she is recalling and applying multiplication and division facts with developing fluency.

She is able to represent and compare simple fractions using visual models and materials and she identifies, represents, and compares simple fractions using materials and visual models.

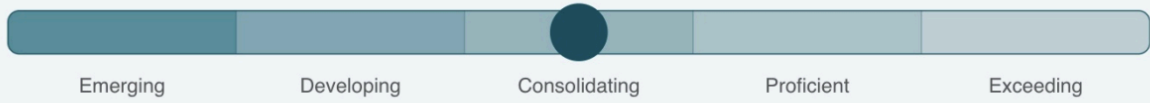

Next steps

- Divide whole numbers by a one-digit divisor with no remainders, using grouping (e.g., $24 \div 3$, $32 \div 4$).
- Partition and regroup whole numbers up to at least 1,000, using a systematic approach and noticing patterns (e.g., $400 + 300 = _$, $350 + _ = 500$).
- Recall multiplication and corresponding division facts for 2s, 3s, 5s, and 10s.

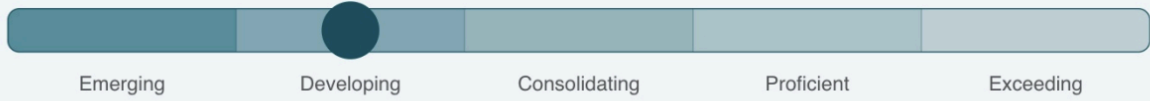

Help at home

- Discuss different ways to solve the same problem.
- Practise multiplication and division facts through games or apps.
- Compare fractions using drawings (e.g., which is bigger: $\frac{1}{2}$ or $\frac{1}{4}$?).
